Prague, September 22,2009

Letter of Recommendation: Stefan Pommerening:

To Whom It May Concern:

I am the Managing Director of TeLogic CZ s.r.o ,a company, specialized in consulting, SW development and projectmanagement in telecommunications industry.

Stefan Pommerening worked as a freelancer on projects for our client „Nokia Siemens Networks” from April 2006 until September 2009. His responsibilities have included:

- product management of ICCM tool, a hardware and software inventory tool for Solaris based systems (e.g. fault tracking, release planning, monitoring, etc.),
- organization of CIT Workshops,
- updating and maintaining the Enabling Concept according to new organizations, new roles and new products,
- service capability creation including actualization of project plans of all product introduction tasks (incl. status monitoring) and review coordination,
- introduction of the new remote access Netras into the technical support including the update of the existing Service Concept for Remote Access according to functionality, how to order and decision tree.

He excelled in the tasks that he was assigned to and was able to complete all works within the contracted time frame. Mr. Pommerening showed a high extent of loyalty and responsibility awareness with all activities. He was able to react flexible to changes from the client's side while showing an outstanding performance and excellent technical know-how.

This combination of organizational talent with impressive problem-solving skills and a hard-working attitude made Mr. Pommerening a very valuable partner for both our client and us. I would certainly recommend him to any client or agency, small or full size.

Sincerely,

Jiri Hruska

Managing Director TeLogic CZ
